SUMMARY

Senior Software Engineer with 6+ years of experience building scalable front-end architectures and design systems, with a strong focus on AI-driven development.
Uses AI agents (Claude Code, OpenAI Codex) daily through agent harnesses and MCP servers, building agent-ready component documentation that guides AI to apply design patterns correctly and custom agent skills that automate day-to-day workflows. Proficient in React, Next.js, TypeScript, TailwindCSS, and Node.js, with strong expertise in design systems, CI/CD pipelines, testing, and accessibility. Experienced in multinational teams and recognized for mentoring squads, improving delivery efficiency, and aligning engineering with business impact.

SKILLS

Proficient: JavaScript, TypeScript, HTML, CSS, React.js, Tailwind CSS, Node.js, Vite, Design Systems development (Storybook)
Intermediate: Angular, Next.js, Jest, Vitest, Testing Library, Playwright, Micro-Frontend, Webpack, GraphQl
AI-Assisted Development: Claude Code, OpenAI Codex, MCP servers, agent harnesses, custom agent skills
Beginner: Python, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer
1global, São Paulo, BR – Hybrid Nov 2025 to Present
Core Responsibilities:

- Developed the company's new IoT portal (React, Next.js, TypeScript, Tailwind CSS), partnering with product and design to turn product needs into features delivered end to end.
- Reviewed technical documents to ensure the backend was aligned with the product needs of the IoT portal, catching several gaps before development started.
- Saw the lack of a centralized design foundation as an opportunity to establish strong front-end standardization: built an IoT UI Kit from scratch with atomic design, every component passing accessibility tests, used on 100% of portal screens and cutting new-screen delivery from days to hours.
- Documented the UI Kit in Storybook, structured to guide AI agents in applying design patterns and components correctly, making the application more consistent and reliable.
- Drove AI-assisted development with Claude Code and OpenAI Codex using agent harnesses and MCP servers, and built custom agent skills that automate day-to-day workflows, such as merge request and pre-merge request code reviews.
- Owned unit and end-to-end testing (Vitest, Jest, Testing Library, Playwright), covering 100% of portal pages with e2e tests.

Key Technologies and Tools: React, Next.js, TypeScript, Tailwind CSS, Storybook, Vitest, Jest, Testing Library, Playwright, Claude Code, OpenAI Codex, MCP

Front-End Architect
Ouribank, São Paulo, BR – Hybrid Mar 2024 to Oct 2025
Core Responsibilities:

- Defined and rolled out a scalable frontend architecture (React, TypeScript, Vite, TailwindCSS), cutting build times and streamlining CI/CD pipelines.
- Optimized the design system, reducing bundle size by 14x and increasing component reusability across 10+ squads.
- Introduced observability dashboards to track DS usage (components, icons, colors), enabling data-driven improvements.
- Built automation scripts that cut 80% of manual component updates, saving ~20 developer hours per sprint.
- Designed internal architecture applications to standardize workflows and boost scalability.
- Mentored 6+ squads on best practices, improving code quality (–25% defects) and delivery efficiency.

Key Technologies and Tools: React, JavaScript, TypeScript, Node.js, Vite, Tailwind CSS, Storybook, Micro-frontend Architecture

Senior Front-End Developer
Ouribank, São Paulo, BR – Hybrid Jul/2023 to Dez/2023
Core Responsibilities:

- Maintained and scaled the company's Design System (React + Tailwind), accelerating UI delivery and ensuring cross-product consistency.
- Spearheaded a company-wide rebranding initiative, aligning 10+ products with new brand identity and improving user trust.
- Delivered a Node.js QA solution, improving element accessibility by 90%+, reducing test creation time from hours to minutes.
- Supported squads as a frontend specialist, raising delivery speed and code maintainability.
- Co-developed a Backend-for-Frontend (BFF), boosting security and optimizing performance of client apps.

Key Technologies and Tools: React, Redux, Styled components, Tailwind CSS, Agile Methodologies, JavaScript, TypeScript, Node.js

Mid-Level Front-End Developer
Ouribank, São Paulo, BR – Hybrid May/2022 to Jul/2023
Core Responsibilities:

- Pioneered the company's first Design System (React + Storybook), standardizing UI libraries and reducing duplicated code across squads.
- Initiated a new Internet Banking platform, modernizing UX for thousands of daily users.
- Led training sessions on modern practices and DS adoption, improving developer onboarding and cross-squad alignment.
- Delivered cross-functional integrations, making the codebase more scalable and maintainable.

Key Technologies and Tools: React, Redux, Styled components, Storybook, JavaScript, TypeScript, Design System Architecture, Agile Methodologies

IT Engineer
Itaú Unibanco, São Paulo, BR – Remote Feb/2021 to May/2022
Core Responsibilities:

- Built responsive UIs for a financial monitoring portal (Angular + TypeScript), supporting 500+ daily users and reducing incident response time by 20%.
- Created Java-based data collection tools, streamlining monitoring workflows and improving accuracy of customer data.
- Delivered Angular training to squads, accelerating team proficiency and reducing onboarding time.
- Introduced micro-frontend architecture, decomposing monoliths into scalable modules.

Key Technologies and Tools: Angular, RXJS, TypeScript, Java, Micro-frontend Architecture, REST APIs

IT Analyst
Itaú Unibanco, São Paulo, BR – Remote Jan/2020 to Feb/2021
Core Responsibilities:

- Built UIs for monitoring portals and internal apps (JavaScript + jQuery), improving system responsiveness and UX.
- Produced 30+ hours of training content, accelerating onboarding and raising team knowledge in modern web practices.
- Developed REST APIs in Java, enabling secure and efficient integration between internal systems.

Key Technologies and Tools: JavaScript, jQuery, Java, REST APIs, Python

EDUCATION

Bachelor of Information Systems
University of São Paulo, Brazil JAN/2018 to Dez/2021

- **Specialized in Information Systems.**

Military Education – Reserve Officer Preparation
CPOR/SP (Centro de Preparação de Oficiais da Reserva), Brazil JAN/2016 to Dez/2016

- **An academic institution focused on military education, developing strong leadership, adaptability, resilience, and discipline.**

LANGUAGES

Portuguese: Native. **English:** Advanced.
